## SWITCH SIGNAL OUTPUT

For individual special functions there are two additional switch tracks on the steel tape scale. The switching point position can be chosen by the user by placing self-adhesive covering tapes.

## VERSION H

TTL output (active high)

S1, S2 = TTL output
$\mathrm{I}_{\text {source }}=1 \mathrm{~mA}$ (high level $>2 \mathrm{~V}$ )
$\mathrm{I}_{\text {SINK }}=20 \mathrm{~mA}$ (low level $<0.8 \mathrm{~V}$ )

## VERSION L

TTL output (active low)

[^0]VERSION Z
Open collector output (active high impedance)

S1, S2 = open collector output
$\mathrm{I}_{\text {SINK }}=20 \mathrm{~mA}$ (low level $<0.8 \mathrm{~V}$ )

VERSION C
open collector output (active low)

## REFERENCE MARK (RI)- AND SWITCH POINTS-SELECTION

Reference mark (RI)-selection

NOTE

Min. distance between reference mark and activation tape S1
MS 15 BK, GK and MK selection of the switch points

S2 $=$ Switch point signal S2 from beginning of ML
$X 2_{L}=$ Activation tape length
$X 2_{L}=S 2+19.5$
EXAMPLE
S2: 20 mm from beginning of ML
$\rightarrow X 2_{L}=39.5 \mathrm{~mm}$
S 1 : 20 mm before end of ML
$\rightarrow X 1_{R}=29 \mathrm{~mm}$

S1 = Switch point signal S1 before end of ML
$X 1_{R}=$ Activation tape length
$X 1_{R}=S 1+9$

MS 15 MP selection of the switch points

S2 = Switch point signal S2 from beginning of ML
$X 2_{L}=$ Activation tape length
$X 2_{L}=S 2+24.5$

## EXAMPLE

$\mathrm{S} 2: 80 \mathrm{~mm}$ from beginning of $\mathrm{ML} \quad \rightarrow X 2_{\mathrm{L}}=104.5 \mathrm{~mm}$
S 1 : 15 mm before end of ML

S1 = Switch point signal S1 before end of ML
$X 1_{R}=$ Activation tape length
$\mathrm{X} 1_{\mathrm{R}}=\mathrm{S} 1+8$

[^0]:    S1, S2 = TTL output
    $I_{\text {SOURCE }}=1 \mathrm{~mA}$ (high level $>2 \mathrm{~V}$ )
    $\mathrm{I}_{\mathrm{SINK}}=20 \mathrm{~mA}$ (low level $<0.8 \mathrm{~V}$ )
